

Nebraska Head Coach Bill Callahan

"This was a good win and I am extremely proud of our football team. All of our players, from the offense to the defense, executed the game plan tonight. A road win in this league is tough. Our defense really rose to the occasion and I am proud of our offensive line. We wanted to start out fast and finish strong, and that is what we did."

On the ability to run the ball:

"We wanted to run the ball tonight and the opening drive set the tone for us. We stalled a little bit in the third quarter. I was really proud of our two backs, Jackson and Glenn. To get two guys over 100 yards rushing is quite an accomplishment. The offensive line played great. We were more physical between the tackles."

On Purify's touchdown catch before halftime:

"It really gave us momentum and it was a huge play in the game. It was an excellent pass and read by Zac. He found what the defense was giving us and made it work. It was just an all-around well executed play."

Nebraska Quarterback Zac Taylor

"It is a huge win for us. This team we played tonight had a lot of talent."

"We got the touchdown a couple seconds before the half ended and it really put the dagger in them."

"One of our goals for the season is to go out there and win in the first quarter, and we did tonight. It really kills the momentum of the other team and gives us confidence."

"It is huge for us to be 2-0 in the Big 12 North and gives us a big advantage."

Nebraska DB Stewart Bradley

"We played a lot more solid this week. We made adjustments from last week and we played a lot better tonight."

"They have a good team with big time players, so we felt good about our performance tonight."

"We stayed focused throughout the whole game and it was a huge advantage for us. We are excited to be 2-0 in the North."

Nebraska RB Brandon Jackson

"I felt great. All the credit goes to the offensive linemen, they had a great game."

"We had confidence to go out there and we made plays."

"They really just couldn't stop us. Our offensive line just kept pounding."

"The O-line has improved most on cut blocks. They chopped them down and we did our job."
